AMENDMENT TWO TO THE MEMORANDUM OF AGREEMENT

ATTACHMENT 6 – SECRETARY OF INTERIOR (SOI) GUIDELINES

STANDARDS FOR PRESERVATION

The Standards will be applied taking into consideration the economic and technical feasibility of each project.

- 1. A property will be used as it was historically, or be given a new use that maximizes the retention of distinctive materials, features, spaces and spatial relationships. Where a treatment and use have not been identified, a property will be protected and, if necessary, stabilized until additional work may be undertaken.
- 2. The historic character of a property will be retained and preserved. The replacement of intact or repairable historic materials or alteration of features, spaces and spatial relationships that characterize a property will be avoided.
- Each property will be recognized as a physical record of its time, place and use. Work
 needed to stabilize, consolidate and conserve existing historic materials and features will be
 physically and visually compatible, identifiable upon close inspection and properly
 documented for future research.
- 4. Changes to a property that have acquired historic significance in their own right will be retained and preserved.
- 5. Distinctive materials, features, finishes and construction techniques or examples of craftsmanship that characterize a property will be preserved.
- 6. The existing condition of historic features will be evaluated to determine the appropriate level of intervention needed. Where the severity of deterioration requires repair or limited replacement of a distinctive feature, the new material will match the old in composition, design, color and texture.
- 7. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.
- **8.** Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.

Preservation as a treatment

When the property's distinctive materials, features, and spaces are essentially intact and thus convey the historic significance without extensive repair or replacement; when depiction at a particular period of time is not appropriate; and when a continuing or new use does not require additions or extensive alterations, Preservation may be considered as a treatment.

The <u>Guidelines for the Treatment of Historic Properties</u> illustrate the practical application of these treatment standards to historic properties.

The <u>Guidelines for the Treatment of Cultural Landscapes</u> apply these treatment standards to historic cultural landscapes.
